SKILLS

- **Cloud Technologies:** Amazon Web Services (Lightsail, S3, Lambda, EC2, DynamoDB), API Gateway, Cloud Architecture, Cloud Storage Solutions, Server Management, Networking (VPC, Subnets, Security Groups)
- **Infrastructure as Code:** Terraform
- **CI/CD Pipelines:** Jenkins, GitHub Actions
- **Programming Languages:** Python, C++, HTML, CSS, Java
- **Web Development:** Frontend & Backend Development, Full-Stack Web Development, Database Management, Version Control (Git), API Development
- **IT Infrastructure:** Linux, Networking, Server Configuration, Database Creation, Role-Based Access Control (RBAC), Network Troubleshooting
- **Problem-solving & Collaboration:** Team Leadership, Goal-Oriented Collaboration, Effective Communication

EXPERIENCE

FDM Group

Remote, USA

IT Operations Practice

May 2025 – June 2025

- Utilized commands and shell scripting to automate tasks, administer, and maintain the reliability of Unix/Linux systems.
- Participated in intensive Linux systems administration training, gaining hands-on experience with command-line operations, system configuration, and troubleshooting.
- Collaborated with diverse technical teams in a fast-paced learning environment focused on enterprise-level system management.

Stephen Bammy LLC

Indianapolis, Indiana

Cloud Infrastructure Intern

Jan 2023 – May 2025

- Developed a full-stack website using AWS Lightsail and other AWS services, enhancing the company's online presence and increasing customer engagement by 85%
- Implemented database solutions and server configurations to optimize data storage and improve operational efficiency by 80%
- Managed both backend and frontend web services to ensure 99.9% uptime, contributing to the company's increased online reliability and seamless user experience.
- Led the migration of internal IT systems to AWS cloud services, reducing server costs by 70% and enhancing scalability for future growth
- Provided front desk customer support, improving customer satisfaction through timely responses and streamlining front-facing operations.

PROJECT

Text-to-Speech Application

Remote – Independent

Cloud Engineer & Developer

Mar 2025 – Present

- Engineered a serverless text-to-speech application using AWS Lambda, Amazon Polly, and Amazon S3, automating audio conversion for arbitrary-length text inputs and reducing manual processing efforts by 100%
- Automated the entire infrastructure provisioning with Terraform, achieving a repeatable, secure, and scalable deployment process that cut setup time by over 95%.
- Implemented robust logging and error-handling strategies with CloudWatch, ensuring near-real-time monitoring and 99% uptime for seamless audio generation.
- Documented project insights and best practices, demonstrating advanced cloud-native techniques and strengthening overall technical proficiency.

PROFESSIONAL CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect – Associate (In Progress)
- CompTIA Security + (In Progress)

EDUCATION

Ball State University

Muncie, Indiana

Bachelor of Science in Computer Science

Expected Graduation: Aug 2027

- **GPA:** 3.6
- **Affiliations:** African Student Association
- **Related Coursework:** Computing in Python and Java, Computer Organization and Architecture, Data Analytics, Cybersecurity.

Ivy Tech Community College

Indianapolis, Indiana

Associate of Science in Computer Science

Graduated, Mar 2025

- **GPA:** 3.6
- **Honors:** Dean's List (Summer 2024)
- **Concentrations:** Cloud Computing & Infrastructure Management
- **Related Coursework:** Computing in Python and C++, AWS Solutions Architect Practices, Object-Oriented Programming, Discrete Mathematics, Approaches to Intelligence, DevOps and Automation
